

Can International Interventions Build States? Evidence from the United Nations Development Programme

Annamaria Prati

Washington University in St. Louis

apрати@wustl.edu

October 29, 2022

Research Question: Are international interventions successful at state-building in failed and fragile states?

- ▶ “State-building” refers to both mitigating violence and building institutions (Lee, 2022)

Research Question: Are international interventions successful at state-building in failed and fragile states?

- ▶ “State-building” refers to both mitigating violence and building institutions (Lee, 2022)
- ▶ Concept: international intervention → builds state institutions → increases state capacity → decreases violence

Research Question: Are international interventions successful at state-building in failed and fragile states?

- ▶ “State-building” refers to both mitigating violence and building institutions (Lee, 2022)
- ▶ **Concept:** international intervention → builds state institutions → increases state capacity → decreases violence
- ▶ **Findings:** As exemplified by the United Nations Development Programme (UNDP), international interventions are associated with decreased violence in failed and fragile states

Conclusion and Future Work

Missing puzzle piece: UNDP

Missing puzzle piece: UNDP

Missing puzzle piece: UNDP

- ▶ Previous qualitative case studies of UNDP do not find it to be effective (Liberia (Autesserre, 2014), Burundi (Campbell, 2018), and Central African Republic (Howard, 2019))

Missing puzzle piece: UNDP

- ▶ Previous qualitative case studies of UNDP do not find it to be effective (Liberia (Autesserre, 2014), Burundi (Campbell, 2018), and Central African Republic (Howard, 2019))
- ▶ UNDP has never been systematically studied per se, so perhaps these are not representative cases

Missing puzzle piece: UNDP

- ▶ Previous qualitative case studies of UNDP do not find it to be effective (Liberia (Autesserre, 2014), Burundi (Campbell, 2018), and Central African Republic (Howard, 2019))
- ▶ UNDP has never been systematically studied per se, so perhaps these are not representative cases
- ▶ I collected a new dataset to answer these questions on the efficacy of international interventions

Expectations: More work, more success

- ▶ **Breadth**: A broader intervention presence, as evidenced by more **projects**, will be associated with decreased violence

Expectations: More work, more success

- ▶ **Breadth**: A broader intervention presence, as evidenced by more **projects**, will be associated with decreased violence
- ▶ **Depth**: A deeper intervention presence, as evidenced by more **expenditures**, will be associated with decreased violence
